DYNACO POWER M3 HIGH PERFORMANCE DOOR

Designed for large interior applications, the DYNACO Power M3 is a safe and reliable high speed, high cycle door solution. The Power M3 boasts an extremely fast open/close cycle, which assures maximum workflow, employee comfort, environmental control and a significant reduction in energy costs. A tight seal also provides protection against air and contaminate infiltration. Soft curtain technology provides protection for employees and product against injury or damage as a result of accidental impact.

- **EXCLUSIVE "PUSH-PULL" TECHNOLOGY**
Patented door drive system insures consistent, maintenance-free performance while eliminating rigid components.
- **PATENTED SIDE FRAME DESIGN**
Pivoting side guides and encapsulated curtain edge provide superior seal, without wear prone and contamination generating blade or brush systems.
- **SELF-REINSERTING**
If accidentally dislodged from the side guides, the curtain automatically re-inserts into the guides without manual intervention.
- **SOFT CURTAIN TECHNOLOGY**
No rigid bottom bars or wind bars/ribs. The M3 Power door's flexible curtain means user and product safety.
- **WIRELESS REVERSING EDGE**
Should anything or anyone come in contact with the bottom edge of the door, a built in sensor automatically reverses the door for maximum safety.
- **FREQUENCY DRIVEN MOTOR WITH ENCODER**
Advanced drive system assures that your Power M3 door will operate smoothly, and reduces the need for wearable elements thus ensuring consistent performance and workflow.
- **DYNALOGIX II CONTROL**
The DYNALOGIX II Controller is user friendly, and offers great flexibility in matching your door needs specifically to your operation.
