

# WORLD'S **smallest** SHUTTER BOX

## QOMPACT® Shutter System

### **Strong and Compact**

Traditional roll shutters require a large 10"-12" (250 mm - 300 mm) housing, ruining the style and look of your home. Now, with the Qcompact shutter system, an 84" (2,1 m) tall opening will require only a compact 6" (150 mm) housing. That is 40-50% smaller, creating a much more appealing installation.

QOMPACT  
VS.  
TRADITIONAL

QOMPACT IS  
40-50% SMALLER  
THAN TRADITIONAL

### **Smooth and Quiet**

The Qcompact® shutter system is available in manual and automatic operation. Using the patented nested design, the Qcompact shutter system rolls **smoothly and quietly**. 6/6 nylon bushings allow the shutter to glide smoothly through the security guides.

## Wide Widths Without Storm Bars and Headers

Case Study: Atlantis Condominium, Pensacola, Florida

AFTER

BEFORE

• Paint outline of old 12" (300 mm) box & header shown upper right

- Traditional shutters require large and ugly storm bars.
- Increase the value of your home while adding the storm protection and security you need with Qcompact.

- Preserve your million dollar views!

### Qcompact Design

#### Strong

The Qcompact shutter is the new standard in storm protection with hurricane rated widths up to 19'6" (5943 mm) wide and curtain hinge strength exceeding 2600 pounds.

#### Strong

- Florida Building Code (FBC) approved
- Clear spans up to 19'6" (5943 mm) wide
- Cycle tested - 15,127 cycles - 41 yr equivalent use
- Patented, Global Patent-Pending

Shutter Height	Qcompact Box Size	Other Shutters Box Size
1753 mm	140 mm	200 mm
2388 mm	150 mm	250 mm
3099 mm	165 mm	300 mm
3785 mm	180 mm	300 mm
4674 mm	205 mm	350 mm

# Qcompact Shutter System

## Smooth and Quiet

*“In addition to the amazingly small hood form and QMI’s typical high level of attention to fit, finish and detail, the Qcompact shutter really impressed me with its ease of operation. For motor operated systems, this translates into such a quiet operation, I find myself looking twice to make sure that the shutter is actually moving! It is by far the quietest rolling shutter of any type that I have personally experienced.”*

– Roll-a-way Gulf Coast

## Elegant Design and Engineered Excellence

What makes the **Qcompact** shutter system unique is the **10 different slat sizes** that have been ingeniously engineered to allow the slats to nest tightly with each other. The nesting allows for virtually zero space between the slats, creating a compact roll and the smallest box housing required.
